

KNOW YOUR CARBON FOOTPRINT AND BECOME CARBON NEUTRAL

A carbon footprint is the total amount of greenhouse gases that are generated by our actions. By making small changes to our actions, we can start making a big difference.

Carbon offsetting is easy and takes just few Steps!

STEP 1 – calculate your (individual) emissions from the previous 12 months using following link:

- Individuals - Use our [FREE online carbon footprint calculator](#)

Provide information of total energy used in the house, mileages of Car, motor bike, bus, rail, flights and other secondary information and result will show your carbon footprints in tonnes of CO₂e.

STEP 2 - start reducing your emissions

- Find out Tips and Advice to help you cut carbon and energy costs using link: [reduce your emissions](#)

STEP 3 – List out the ways you contribute to reduce your carbon footprint the most

STEP 4 – set your targets and recalculate your carbon footprint

STEP 5 - Prepare a poster on selected ways reflects your carbon footprint reduction in tonnes of CO₂e.

STEP 6 – upload poster on Blackboard.
